

Anthony Szabo

Computer Scientist / Data Scientist
Located in Central Connecticut

CONTACT

-  GitHub
-  Portfolio Website
-  LinkedIn
-  anthony_szabo@hotmail.com
-  860-840-1333

LANGUAGES

- Python
- Java
- SQL
- C++
- Lua
- HTML

PLATFORMS AND APPLICATIONS

- Jupyter
- Git
- VS Code
- IntelliJ / Visual Studio
- Coppeliasim Edu
- pgAdmin / MySQL Workbench

ML TOOLS

- Keras
- Tensorflow
- Scikit-learn

LIBRARIES

- Pandas
- Numpy
- Matplotlib
- Seaborn

AWS SERVICES

- Storage (S3, RDS)
- CI / CD (CodePipeline, CodeBuild, CloudFront)
- Elastic Beanstalk

CURRENTLY LEARNING

- AWS
- Django / FastAPI
- AI Agents
- Containerization (Docker)
- Web Hosting (Apache / NGINX)

EDUCATION

Western Governor's University

Expected June 2026

Bachelor of Science - BS, Computer Science

- Completed coursework at an accelerated rate with material including object-oriented program using Java, SQL data manipulation, software development lifecycle planning, and more
- Experience with many new languages, libraries, frameworks, and environments in real-world problem-solving scenarios

Springboard

December 2022

Certificate of Completion, Data Science Career Track

- 550+ hours of curriculum related to Python, SQL, Statistical Analysis, Data Visualization and Data Communication, and Machine Learning involving Time Series Analysis and Neural Networks
- Expert mentor oversight on 2 in-depth capstone projects

EXPERIENCE

Miss Lizzy Thyroid Supplements

May 2022 - September 2022

Data Analyst

- Used Google Analytics and Data Studio to track customer journey from advertisement to sale
- Explored and analyzed sales data for patterns related to customer lifetime value
- Insights led to focus on coaching program, increasing customer lifetime value

Olive Garden

April 2024 - December 2025

Waiter

- Worked full time while in school to support myself and my education
- Trusted to undertake higher guest counts than peers on account of skills

Vyne Restaurant and Bar

November 2025 - Present

Waiter

- Worked full time while in school to support myself and my education
- Demonstrated elevated service style to align with more upscale environment

PROJECTS

Portfolio Website

Demo [GitHub](#)

- Using React JavaScript library with Tailwind CSS framework to build sleek, modern portfolio
- Implemented features such as react-router-dom, snap scroll, and button animations
- Deployed site to GitHub Pages

Fight Result Predictor

Demo [GitHub](#)

- Used data science method to clean, explore, and analyze existing fight data
- Created backtesting program to fine-tune parameters for machine learning models
- Used Python to program data scrapers, loaders, and predictors in a FastAPI back end
- Stored all data in a fully integrated, RDS stored PostgreSQL back end
- Created React front end and deployed site using AWS

GDP Time Series Analysis

[GitHub](#)

- Used Data Science method to clean explore and analyze data
- Used multiple machine learning algorithms to train models and make predictions
- Made confident conclusions based on strong evidence and well-trained models
